

### Assignment – 13

Using the UNION clause.

1) Create a union of two queries that shows the names, cities, and ratings of all customers. Those with rating of 200 or greater will also have the words “High Rating”, while the others will have the words “Low Rating”.

```
KD3_86676_Deependra@>select cname, city, rating, 'Heigh Ratings' as "Remarks"
from customers where rating>=200 union select cname,city,rating, 'Low Rating'
as remarks from customers where rating<=200;
```

cname	city	rating	Remarks
Giovanni	Rome	200	Heigh Ratings
Liu	San jose	200	Heigh Ratings
Grass	Berlin	300	Heigh Ratings
Cisneros	San jose	300	Heigh Ratings
Hoffman	London	100	Low Rating
Giovanni	Rome	200	Low Rating
Liu	San jose	200	Low Rating
Clemens	London	100	Low Rating
pereira	Rome	100	Low Rating

9 rows in set (0.00 sec)

2) Write a command that produces the name and number of each salesperson and each customer with more than one current order. Put the results in alphabetical order.

```
KD3_86676_Deependra@>select sname,snum,cname,cnum from salespeople join customers
using(snum) where snum in (select snum from customers group by snum having
count(snum)>1)order by sname;
```

sname	snum	cname	cnum
peel	1001	Hoffman	2001
peel	1001	Clemens	2006
Serres	1002	Liu	2003
Serres	1002	Grass	2004

4 rows in set (0.00 sec)

3) Form a union of three queries. Have the first select the snums of all salespeople in San Jose; the second, the cnums of all customers in San Jose; and the third the onums of all orders on October 3. Retain duplicates between the last two queries but eliminate any redundancies between either of them and the first.

(Note: in the sample tables as given, there would be no such redundancy. This is besides the point.)

```
KD3_86676_Deependra@>SELECT snum from salespeople WHERE city='san jose'  
-> UNION  
-> SELECT cnum from customers WHERE city='san jose'  
-> UNION  
-> SELECT onum FROM orders WHERE odate='1990-10-03';
```

```
+-----+  
| snum |  
+-----+  
| 1002 |  
| 2003 |  
| 2008 |  
| 3001 |  
| 3003 |  
| 3002 |  
| 3005 |  
| 3006 |  
+-----+
```

```
8 rows in set (0.00 sec)
```
